

1 IN THE ABSTRACT

2 Please delete the originally filed Abstract, and
3 substitute the following new Abstract therefor:

4
5 --A portable workstation ergonomically designed to
6 ease muscle tension for portable computer users is
7 disclosed. The workstation comprises foldably coupled
8 surfaces which provide an easily folding and portable
9 workstation with a raised work surface, which raises, for
10 example, the computer screen and keyboard of a laptop to a
11 more comfortable height for the user. The workstation also
12 includes a raised and tilted surface with a lip to secure
13 items in place on the work surface.--
